

Because babies younger than 3 months cannot fight against it ...  
Because a non-vaccinated adult can be infected without being aware of it ...  
Because that adult can contaminate defenseless babies...  
Because a big hug has been fatal for me ...  
Because this may never happen again...  
And because my death was so easy to avoid ...

ADULTS, GET YOUR BOOSTER AND ...

GIVE WHOOPING COUGH NO CHANCE

*Lore*

°17.08.2010 - †07.11.2010 (83 days)

We've never been told about the dangers of whooping cough and the importance of the cocoon vaccination. So, we were not vaccinated and ...

We contaminated that way our little baby girl.

Going to sleep every night with the knowledge that we contributed to the death of our baby, that's our daily nightmare we will have to live with for the rest of our lives.
